GETTING STARTED WITH VEGETABLE PLASTICULTURE

WEBINAR

WEDNESDAY, OCTOBER 22, 2014, 7:00-9:00 PM (EASTERN TIME)

MSU EXTENSION 2014 BEGINNING FARMERS WEBINAR SERIES

Join us for an interactive 2-hour webinar. $10 registration fee.
Participate from your home or office computer (hi-speed internet required).

Why participate?

Plasticulture is a technique used by many vegetable growers to improve crop quality and production. It helps control weeds, reduces some diseases and is a more efficient use of water and nutrients. Plasticulture also brings crops into production sooner which is important in short growing seasons.

This 2-hour Adobe Connect webinar is part of the ongoing "2014 Beginning Farmer Webinar Series". MSU Extension educator Ron Goldy will present information on implementing plasticulture techniques for beginners. Questions and discussion will take place through the webinar 'chat' function.

Supporting written materials will be available for download during and after the webinar. Participants will receive the webinar URL after their registration and payment is received. A recording of the webinar will be made available to registered participants.
