Agriculture and Agribusiness Institute
Dept. of Plant, Soil and Microbial Sciences
MSU Extension Field Crops Team
Eaton County MSU Extension

Michigan State University is an affirmative-action, equal opportunity employer. Michigan State University Extension programs and materials are open to all without regard to race, color, national origin, gender, gender identity, religion, age, disability, political beliefs, sexual orientation, marital status, family status or veteran status.
This crop management Extension update is for Agri-businesses, Pesticide Sales and Service Professionals, Crop Consultants, and farmers. We will look back at the 2015 crop season and discuss the upcoming 2016 recommendations for weed, insect, and diseases. Farmers needing pesticide re-certification credits before the end of year could earn MDA and CCA credits.

With grain prices declining and production costs rising, it is important that farmers and agri-business professionals consider all production management options and remain up-to-date on the latest MSU recommendations.

At this meeting, you will receive up-to-date information on 2016 MSU pest control recommendations and options. This event will enable you to make year-end pesticide sales and purchasing decisions for the upcoming cropping season. MSU Extension specialists will be present to answer your questions.

The program will be held on Tuesday, December 15, 2015 at the MSU Pavilion. The cost of the program is $60 per person, which includes refreshments, lunch, 2016 MSU Weed Control Guide for Field Crops (E-434), and other Extension bulletins.
